

AYUSH THAKUR

LEAD FRONTEND ENGINEER | UI ARCHITECT

ayushthakur2009@gmail.com | Bengaluru, India +91 9916025620 | [LinkedIn](#) | [Medium](#) | [Portfolio](#)

SUMMARY

AI-Augmented Frontend Leader & UI Architect with 10+ years of enterprise experience designing, modernizing, and scaling mission-critical web applications across fintech, banking, and enterprise domains. Fuses deep technical authority in modern Angular (Angular v20, Signals, Zoneless), TypeScript, Micro Frontends (Module Federation), and Nx monorepos with cutting-edge agentic AI workflows (Claude Code). Proven track record leading full-scale stack modernizations, establishing enterprise design systems and leveraging AI engineering to boost developer velocity by up to 50%.

CORE COMPETENCIES & TECHNICAL STACK

- **Frontend & Reactive UI:** Angular (v2-v20+, Signals, Zoneless), TypeScript, JavaScript (ES6+), RxJS, NgRx, React, HTML5, SCSS
- **Architecture & Scale:** Micro Frontends (Module Federation), Nx Monorepos, Enterprise Design Systems, State Management
- **AI-Augmented Engineering:** Claude Code (agentic code generation, refactoring, test scaffolding), Prompt Engineering, AI CI/CD Workflows
- **Build, Testing & Perf:** Webpack, Docker, Git, CI/CD, Jest, Playwright, Core Web Vitals, Bundle Optimization, WCAG
- **Leadership & Strategy:** Architectural Governance, AI Tooling Strategy, Technical Roadmapping, Team Mentorship, Agile/Scrum

PROFESSIONAL EXPERIENCE

Lead Engineer | FICO

Jul 2025-Present | Bengaluru, India

- Architect modular enterprise UI platforms on Angular v20 leveraging Signal-based reactivity, standalone components, and Zoneless architecture within an Nx monorepo to maximize runtime performance.
- Drive micro frontend adoption via Module Federation, decoupling release cycles to enable zero-downtime, independent deployments across distributed product micro-apps.
- Pioneer AI-native development workflows using Claude Code for agentic code generation, automated unit test scaffolding, and boilerplate refactoring, accelerating sprint feature delivery by ~50%.
- Establish enterprise frontend standards, AI coding guardrails, Core Web Vitals benchmarks, and PR review governance.

Senior Manager | Morgan Stanley

Aug 2021-Jul 2025 | Bengaluru, India

- Architected and owned the UI platform for a mission-critical fixed income pricing & portfolio optimization platform, delivering sub-second rendering for high-frequency real-time market data streams.
- Served as sole frontend technical authority, bridging architectural alignment between quantitative analytics, cross-functional backend engineering teams, and institutional trading stakeholders.
- Managed multi-quarter technical roadmaps and provided firm-wide Angular consulting, standardizing reactive state management patterns (RxJS, NgRx) across internal trading desks.

Software Engineer II | FIS (Fidelity Information Services)

Dec 2019-Aug 2021 | Bengaluru, India

- Spearheaded full-scale legacy modernization, migrating a monolithic core banking platform to a modern Angular stack.
- Engineered a centralized, WCAG-compliant design system and optimized bundle sizes, establishing uniform UX patterns and significantly improving Core Web Vitals across banking modules.

Associate Tech Lead | Zycus

Jul 2018-Dec 2019 | Bengaluru, India

- Led end-to-end frontend re-architecture of enterprise procurement suites into modular Angular applications and engineered reusable UI component libraries to accelerate feature turnaround.

System Engineer / Full Stack Developer | Infosys

Jan 2016-Jul 2018 | Bengaluru, India

- Modernized telecom infrastructure by developing full-stack software solutions replacing legacy hardware encryption and building scalable frontend user interfaces.

EDUCATION & ADDITIONAL HIGHLIGHTS

- **B.Tech in Computer Science Engineering (2016):** Galgotias University | CGPA: 9.29 / 10.0
- **Technical Writing:** Medium author on Frontend Architecture (@just-another-developer)
- **Leadership & Mentorship:** Lead a 200+ member music community; mentor engineers in AI & architecture.
